EDUCATION

The University of Chicago

M.S., Computational Analysis and Public Policy
Coursework: CS with Applications I & II, Advanced Statistics

Chicago, IL
June 2027 (Expected)

Lahore School of Economics

B.Sc., Economics and Political Science
Coursework: Econometrics, Time Series Analysis

Lahore, Pakistan
May 2022

SKILLS

Technical Languages: Python, R, Stata, HTML
Libraries/Frameworks: Pandas/Polars, NumPy, Tidyverse, HTTPX, Altair, Shapely, NetworkX
Software: GIT, ArcGIS/QGIS, Microsoft Suite, SurveyCTO
Certificates: MITx Micromasters in Data, Economics and Design of Policy

PROFESSIONAL EXPERIENCE

Division of the Social Sciences - The University of Chicago

Research Assistant

Chicago, IL
January 2026 – Present

- Employ a natural experiment to understand how economics elites use offshore banking to protect their wealth when populist or leftist politicians are elected to office
- Use Python (polars) to clean, synthesize and analyze the election and inauguration datasets of 3000+ rows and determined the exact timings of elections and inaugurations for over 180 countries from 1990-2020

Centre for Economic Research in Pakistan (CERP)

Research Associate

Lahore, Pakistan
October 2024 – August 2025

- Exploited reform implementation timing to implement a natural experiment to gauge benefits and negative implications of a land reform in Punjab meant to empower women
- Contributed to the development of an mHealth application for an RCT, embedding clinically guided algorithms that helped community health workers deliver appropriate breastfeeding advice to improve maternal and child health outcomes in 3 rural districts of Punjab
- Built R scripts to automate SurveyCTO API data ingestion and daily progress reporting, supporting real-time monitoring, anomaly detection, and data quality improvements for a team of 13
- Managed field operations and quality checks for large surveys (N = 10,000); trained and supported teams of 50 enumerators

Mahbub ul Haq Research Centre at LUMS

Senior Research Assistant
2024

Lahore, Pakistan
December 2022 – September

- Trained a Random Forest machine learning algorithm in R (randomForest) on primary survey data to perform large-scale property value prediction on Lahore's 1M+ property cadaster
- Led the implementation of an RCT involving 7,500 property owners in Lahore; spearheaded the [project's fieldwork](#) by supervising enumerators and conducting 50 pilot surveys to inform the design of the questionnaire
- Built data pipelines for processing primary survey data from over 8,000 survey respondents in R (tidyverse); designed 3 different survey instruments using SurveyCTO for primary data collection
- Led focus group discussions with 15 real estate experts in Lahore to identify key market factors influencing a property's value
- Implemented GIT workflows via GitHub for version control to support collaboration within a team of 10

PROJECTS

Chi-Ed

January 2026 – Present

- Fetching Chicago Public School JSON API data using HTTPX and Illinois State Board of Education (ISBE) CSV datasets to build a dashboard mapping high school outcomes for 150+ schools across Chicago using the dash library in Python
- Set up data cleaning and merging pipeline in Python to clean and merge JSON API data with ISBE dataset on individual school report cards
