EDUCATION

The University of Chicago

M.S., Computational Analysis and Public Policy

Coursework: CS with Applications I & II, Data and State

Chicago, IL

June 2027 (Expected)

Lahore School of Economics

B.Sc., Economics and Political Science

Coursework: Econometrics, Time Series Analysis

Lahore, Pakistan

May 2022

SKILLS

Languages: Python, R, SQL (SQL Server & Oracle), Stata, HTML, CSS, JavaScript

Libraries: Pandas/Polars, Tidyverse, Altair, Shapely, NetworkX, Dash

Software: Git, ArcGIS/QGIS, Microsoft Suite, SurveyCTO, Figma

Certificates: MITx Micromasters in Data, Economics and Design of Policy

PROFESSIONAL EXPERIENCE

New York City - Department of Finance (DOF)

New York, NY

Data Science Intern - Property Modeling Team

June 2026 – August 2026

- Contribute to the development of *assessNYC* an internal R package, used by DOF to streamline the property valuation process; added a new function that measures the Vertical Equity Index for given assessed values
- Developed a full-stack internal dashboard in Python to facilitate property tax assessors across the 5 boroughs to look up comparable properties - the tool synthesized and automated data processing using data from legacy databases (Oracle & SQL servers), third party APIs and redundant excel files

Division of the Social Sciences - The University of Chicago

Chicago, IL

Research Assistant

January 2026 – May 2026

- Built a data pipeline in Python to integrate and harmonize global election data (180+ countries, 1990–2020) with 3M+ Panama/Pandora Papers records, including entity resolution and record linkage to match offshore accounts to individuals and countries at scale
- Engineered a structured dataset from unstructured leaks data to support causal identification of wealth-shielding behavior among economic elites around progressive electoral events

Centre for Economic Research in Pakistan (CERP)

Lahore, Pakistan

Research Associate

October 2024 – August 2025

- Contributed to the development of an mobile health application for an RCT, embedding clinically guided algorithms for community health workers to deliver appropriate breastfeeding advice to improve maternal and child health outcomes in 3 rural districts
- Wrote R functions to automate SurveyCTO API data ingestion and daily progress reporting, supporting real-time monitoring, anomaly detection, and primary survey data quality improvements for a team of 13

Mahbub ul Haq Research Centre at LUMS

Lahore, Pakistan

Senior Research Assistant

December 2022 – September 2024

- Trained a Random Forest machine learning algorithm in R (randomForest) on primary survey data to perform large-scale property value prediction on Lahore's 1M+ property cadaster
- Led the fieldwork for the project to build an informed survey instrument based on real user feedback. Designed and delivered trainings to teams of up to 25 enumerators on how to deliver the survey.

PROJECTS

[Chi-Ed - Comparing Highschool Outcomes in Chicago](#)

January 2026 – March 2026

- Built an interactive dashboard and a command-line interface (CLI) tool in Python to allow users to analyze and compare educational outcomes across schools and neighborhoods in Chicago
- Designed a data pipeline combining Chicago Public Schools API data and ISBE datasets, performing data cleaning and record linkage using string-matching techniques to unify 150+ school records
